

Motivation for exclusions of specialist studies

Agriculture potential	This assessment was not deemed necessary because the area which the school is going to be built on, although it used to be cultivated in the past. The traditional authority has allocated it for the school construction because it has been noted not to yield good agricultural crops, and so far, many locals had deserted it. It is currently recovering from those activities for many years.
Archaeological and Cultural Heritage Impact Assessment	A HIA study was undertaken as part of this study.
Palaeontology Impact Assessment	A HIA and PIA letter of Exemption was undertaken as part of this study.
Terrestrial Biodiversity Impact Assessment	An Ecological impact assessment was conducted for both Floral and Faunal Components on this study
Aquatic Biodiversity Impact Assessment	This assessment was not deemed necessary because there is no intermittent or perennial river on site or within 500 metre radius.
Socio-Economic Assessment	The socio-Economic study phase 1 is done for this study, the LDPWR&I has appointed a social facilitator for the entire life span of the project.
Plant Species Assessment	An Ecological impact assessment was conducted for both Floral and Faunal Components on this study
Animal Species Assessment	An Ecological impact assessment was conducted for both Floral and Faunal Components on this study
Landscape/Visual Impact Assessment	This assessment was not deemed necessary as Rethuseng Special School will only be constructed using only one ground floor classrooms which standard buildings in the surrounding area. However, the proposed construction will enhance the visual appeal of the school but also improve functionality as well.
Defence	This assessment was not deemed necessary as there is no known defence installation within 10kilometre radius
